RUTIK KANZARIYA

+91-9624690529 | rutikkanjariya@gmail.com | github.com/rutikkanzariya | linkedin.com/in/rutik-kanzariya

B.Tech CSE student with hands-on experience in GenAI, RAG, multi-agent systems, and full-stack development. Experienced in building and deploying AI-powered applications using Python, LangChain, FastAPI, React, Node.js, and cloud platforms.

EDUCATION

B.Tech, Computer Science & Engineering
GLS University, Faculty of Engineering and Technology, Ahmedabad
2023 –2027 | CGPA:8.53 / 10

SKILLS

Languages : Python, JavaScript, HTML, CSS, TypeScript
Databases : PostgreSQL, MongoDB
Libraries : React, Node.js, Express.js, Scikit-learn, TensorFlow, PyTorch, Pandas, NumPy, Seaborn, MatplotLib
GenAI : LangChain, LangGraph, RAG, Multi-Agent Systems, MCP, LLM APIs
Deployment : Docker, CI/CD (GitHub Actions), AWS (EC2, S3, IAM), Streamlit Cloud, Vercel, Render
Tools : Git, GitHub, VS Code, Jupyter Notebook, Google colab
Backend & APIs : REST APIs, FastAPI, JWT Authentication, Thunder Client, API Rate Limiting

PROJECTS

LearnFlow - *AI-Powered Personalized Learning Platform*
GitHub Link - *https://github.com/RutikKanzariya/Learnflow* **LIVE**

- Built a full-stack AI learning platform using React, Node.js/Express, MongoDB, and FastAPI with 25+ REST APIs and a RAG-based tutor using LangChain, Gemini, and ChromaDB for PDF-based question answering.
- Developed AI-generated roadmaps, quizzes, and flashcards with topic-level mastery tracking, spaced repetition, gamification (XP, streaks, leaderboard), and voice-based tutoring.
- Implemented collaborative study rooms with real-time chat, lesson notes, bookmarks, and Gemini fallback responses to maintain AI functionality when no document is uploaded.
- Secured the backend with JWT authentication, bcrypt, Zod validation, and rate limiting; automated CI/CD deployment to Vercel and Render using GitHub Actions.

Multi-Agent Research Pipeline - Python, LangChain, Groq (LLaMA 3.3), LCEL
GitHub Link - *https://github.com/RutikKanzariya/Agent_Research* **LIVE**

- Built a 4-agent research automation pipeline using LangChain — Search, Reader, Writer, and Critic working in sequence to research any topic end-to-end.
- Search Agent autonomously finds relevant, recent sources on a topic using tool-calling (web search).
- Reader Agent scrapes the most relevant source for deeper content using a scraping tool.
- Writer chain (LCEL) drafts a structured report (Introduction, Key Findings, Conclusion, Sources), and a Critic chain reviews and scores it with strengths and areas to improve.

Deepfake Detection System - Multi-modal AI (Image, Video, Audio) **LIVE**
GitHub Link - *https://github.com/RutikKanzariya/DeepfakeDetection*

- Built a multi-modal deepfake detector covering images, video and audio: transfer-learned Xception (299×299) for images, Xception frame features with an LSTM for video, and a custom CNN on mel-spectrograms for audio, reaching ~75% accuracy.
- Engineered preprocessing pipelines with OpenCV and Librosa: uniform frame sampling, 4-second 16 kHz audio converted to normalized 128-band log-mel spectrograms, an 80/20 train/validation split, and dropout to limit overfitting.
- Developed a web app where users upload images, videos or audio and get real-time deepfake predictions from the trained models.

CERTIFICATIONS / ACHIEVEMENTS

- Won 1st place in Cipher Hunt at Cyber Shadez 2026, a cybersecurity competition organized by GLS University.
- Green Skills & AI Foundation Course - Edunet Foundation, Shell India & AICTE - AI/ML, NLP, Generative AI & RAG (Jul 2025)
- Deloitte Data Analytics Job Simulation - Forage (Dec 2025)
- AWS Academy Graduate - Cloud Foundations - Amazon Web Services Training and Certification (2026)
